The Alfa Romeo Giulia in Orlando, FL

Research & Explore the Alfa Romeo Giulia near Orlando

The wide world of sports sedans and luxury cars is filled with compelling choices, like the BMW 3 Series, the Mercedes-Benz C-Class and the INFINITI Q50. But the competition has nothing over the new Alfa Romeo Giulia. The Alfa Romeo Giulia is all about providing a refined yet racy on-road demeanor that amps up every trip you take near Winter Garden, Windermere or nearby. Interested in reading more about the well-appointed Giulia sports sedan? Learn all about it, below!

Performance & Drivetrain

The Alfa Romeo Giulia comes well-equipped to outperform the competition with a standard turbocharged four-cylinder that makes 280-horsepower. Looking for an even more engaging engine choice? There's one to be found in the upgraded Giulia Quadrifoglio trim, and it provides all the thrill of 505-horsepower for a rip-roaring good time every time your right foot hits the gas pedal. Choose another trim, and you'll also be able to equip your Giulia with all-wheel-drive (rear-wheel-drive is the default drivetrain option).

Refined Style

Some sports sedans blend in. Not the Alfa Romeo Giulia. If we had to pick just one word to describe the Giulia's exterior appearance here at Alfa Romeo of Central Florida, we'd say "sculptural". That's because with its fluid lines and flowing curves, the Giulia is the epitome of artful, sensuous automotive design. Inside, too, you'll find a layered interior with a place for everyone on your A-list, not to mention a range of quality materials found at every touch point.

Safety Features

From a backup camera to parking sensors, the Giulia offers a competitive array of standard safety features designed to help you maximize your driving enjoyment by worrying less about "what-ifs". To further protect you, your passengers, and others on the roads of Lake Mary and nearby, you can even equip your Giulia with active safety features like:

- Adaptive Cruise Control with Full Stop®
- Lane Departure Warning®
- Full-Speed Forward Collision Warning Plus
- Automatic High-Beam Headlamps
- Alfa Romeo DNA Drive Mode Selection
- An Infrared Windshield

Technology & Infotainment

It's not just impressive safety technology that the Giulia boasts, though there is plenty of that available. This Alfa Romeo sports sedan also is available with all the latest comfort, convenience, and infotainment technologies you're craving from your next car. For starters, every new Giulia boasts a 6.5-inch touchscreen infotainment system with USB and Bluetooth connectivity to keep you in the loop during every drive. Apple CarPlay™ and Android Auto™ further simplify the Giulia driving experience. What's more, you can upgrade to an 8.8-inch touchscreen system with 14 Harmon Kardon speakers and a navigation system.
