Explore the Audi e-tron Luxury EV near Los Angeles

Friday, 23 August, 2019 | Audi Beverly Hills

The new 2019 Audi e-tron quattro is unlike any other vehicle we have for sale here at Audi Beverly Hills. That's because the Audi e-tron is a new kind of Audi. Equal parts environmentally-conscious, rugged, and luxurious, the e-tron is a convention-crushing luxury crossover that also happens to be an electric vehicle. Read on, below, to learn more.

Why Consider an Audi e-tron from Our Audi Dealership in Beverly Hills?

There are so many reasons to choose the Audi e-tron over the competition in North Hollywood or West Hollywood. Explore just a handful, below.

- **EV Perks:** The Audi e-tron makes range anxiety a thing of the past. Why? The e-tron is capable of traveling up to about 204 miles on a single charge. And it can accumulate up to 54 miles of range on a 10 minute charge alone. That means, in the time it takes to make your breakfast, your e-tron could be ready for the day's commute – given that the average American has a roughly 160-mile weekly, or 32 mile daily – commute. Other perks to choosing an Audi EV? Less emissions. Less carbon footprint. Less hassle and cost to service. And less road noise.
- **Luxury Amenities:** The Audi e-tron might be an EV, but it's an Audi first and foremost. That means, it's equipped with all the kinds of amenities you'd expect from the Audi brand, including luxuries like the finest leather upholstery, an adaptive air suspension for enhanced comfort, four-zone climate control, an available panoramic sunroof, and so much more.
- **Safety & Technology:** From its Audi MMI® touchscreen infotainment with wireless Apple CarPlay™ integration to its standard Audi pre-sense® rear active safety suite, the Audi e-tron is at the cutting edge of the luxury car scene with regard to safety and technology.
- **Capable quattro AWD:** Audi quattro AWD gives the Audi e-tron unparalleled capability in inclement weather and over rough road conditions.
- **Trims & Options:** Equip the e-tron to your liking with features like the leather package, the lighting package, the storage package, and more, each of which adds an extra layer of comfort and luxury to this already well-equipped Audi EV.
