

Ferrari F12 tdf : The New Ferrari of Your Dreams

Sunday, 21 January, 2018 | [Boch Exotics](#)

The Ferrari F12 tdf puts the dream in dream-car. As in, you'll be dreaming about this car the moment you lay eyes on it. Extremely desirable, this Ferrari model is based off the f12berlinetta, but features a modicum of improvements over that model that push the boundaries of what a Ferrari can achieve.

F12 highlights include:

- A curb weight of 3,351 pounds
- A 46%/54% front axle/rear axle distribution
- 0-62 MPH time of 2.9 seconds
- A 769-BHP V12 engine

In addition to powerful performance and stunning specs, this Ferrari benefits from a seductively styled design, that manages to be both aggressive and sculptural at the same time. Inside the cabin, you'll find premium materials like Alcantara suede and carbon fiber that not only add to this car's sporty appeal, but also save weight and help keep this car ahead of the competition. This is the Ferrari for the ultimate Ferrari fan who seeks performance above all else, though other Ferrari models offer a more balanced blend of luxury, features, and performance.
